■ Objective

Aspiring Software Engineer with strong foundations in Data Structures, Algorithms, and Full-Stack Development. Experienced in building scalable web applications. Seeking opportunities to contribute technical expertise and grow in product-based companies.

■ Education

Gates Institute of Technology – B.Tech, CSE (AI)

2023 – Present | CGPA: 7.52/10

■ Technical Skills

Programming Languages: Python, Java (DSA)

Web Development: HTML, CSS, JavaScript, React.js, Node.js, TailwindCSS

Databases: MySQL, MongoDB

Core CS: OOP, DBMS, OS, Computer Networks

Tools & Platforms: Git/GitHub, VS Code, Postman, Canva

■ Projects

Personal Portfolio Website | React.js, TailwindCSS

Developed a responsive portfolio website to showcase projects and skills.

Weather Predictor | Python, ML

Built a weather prediction model using historical data and ML algorithms to forecast temperature and rainfall patterns.

■ Experience / Activities

- Participated in college hackathons, developed working prototypes under tight deadlines.

- Active on LeetCode (200+ problems) and GeeksforGeeks (150+ problems), focusing on DSA and problem-solving.

■ Achievements

- Solved 200+ coding problems on LeetCode/GFG.

- Consistently maintained 7.5+ CGPA while working on projects.
